

Mobile Web Counts

Dura-Sys can optionally make available a Web screen designed for Wireless devices such as web enabled Cell phones, and PDAs that will also display the current production status information.

The production information is for the current open and completed jobs for this shift only. The information in this data set is updated at a configurable rate (for example 12 times per hour).

The standard production information consists of:

- Line ID
- Part Number
- Current state
- Current hour part count
- Total part count for this shift or Job.
